Introduction

I am a passionate, ambitious and motivated engineer looking forward to learning and making a name for himself in the world of Computer Engineering. I consider that I have a great social attitude and I do not hold back in the face of difficulties

Experience

-6 months of experience in an international enterprise called [DTN](#) which is concerned with meteorological data and its transmission as a junior full-stack engineer.

-6 months of work as a Freelancer working with Node.js and Vue.js technologies.

-14 months working in Fidetia (research center in The University of Seville) as a full-stack engineer but specialising as a data science developer

Attitudes

- Communication skills.
- Passion for Computer Engineering in the development of AI and web creation.
- Sportsman with an emphasis on WindSurfing, soccer and swimming.
- Leader skills.

Education

BACHELOR OF INFORMATIC ENGINEERING OF SOFTWARE

University of Seville (Sept. 2018 - 2022)

- Passed all exams without any retakes in additional years.
- Passed all projects with a good mark.
- Award for the best speaker in the subject Software Engineering and Professional Practice.
- I have a grade of 9.4 in my Final Degree Project (TFG) based on Convolutional Neural Networks on a Node.js and Vue.js web application

ENGLISH LANGUAGE INSTITUTE

[ELI of Seville](#), Triana (Sept. 2010 - 2018)

- 8 years of experience with English language
- Cambridge **C1** Certificate Level of English
- High level of Oral Expression.
- High level of Reading.
- High level of auditive comprehension.

TECHNOLOGICAL HIGH SCHOOL

[Maristas](#), Sevilla (Sept. 2016 - 2018)

- Technological baccalaureate certificate.
- Specific pieces of knowledge in physics, tech drawing and maths.
- 9 average in High School

Personal projects

Various projects carried out both at the training level and on their own

- JAVA app using Spring MVC with data base H2.
[See it in Github](#)
- Web app using PHP + Html concerned in organization of an optician's shop.
[See it in Github](#)
- Web app using jsp + Html + API Rest + servlet + openAPI(swagger) + oauth2.
[See it in Github](#)
- MYSQL database of an optician's shop.
[See it in Github](#)
- MongoDB and node project concerned to the creation of an API which manages a database of songs.
[See it in Github](#)
- MongoDB, node and VueJS app to manage a fitApp project called fitMeApp.
[See it in Github](#)
- HTML, js and css web to ease working in an enterprise with csv files.
[See it in Github](#)
- MongoDB, Vue, and node web which uses APIs of social networks as Gmail, Twitter, Facebook and Telegram.
[See it in Github](#)
- AI project which uses Scikit-learn, Pandas, and Python to predict values in a relational graph database from Kaggle.
[See it in drive](#)
- AI project using Tensorflow and python to predict if an image is from a man or a woman.
[See it in drive](#)
- TFG based on MongoDB, node, VUE, Tensorflow and TensorFlow JS, related with explained convolutional neural networks models.
[See it in Github](#)

Other competences

-6 years of Karate and blue-brown belt.

-2 years and one diploma in windSurfing.

-Driving license for cars.
